Create customer-pleasing recipes with the BUNN Infusion Series® Iced Tea Brewer

Advanced brewing technology coupled with a great price make Infusion Series Iced Tea Brewers (ITB) a smart choice. Complete control over the brewing process for maximum consistency and flavor extraction are provided with Infusion Series pre-infusion and pulse brew technology.

The ITB's large tank provides 3 or 5 gallon (11.4 to 18.9 litre) batches or 16.3 to 26.7 gallons (61.7 to 101.1 litres) per hour. Also available in a low-profile model (ITB-LP) is 28.75 in (73 cm) tall and a dual dilution model (ITB Dual Dilution) brews 6 gallons of tea into two BUNN narrow tea dispensers taking up just 12.15" (30.9 cm) of countertop. The ITB and ITB Dual Dilution are available with sweetener option and adjustable sweetness settings for sweet tea.

Infusion Series Tea Brewers also have adjustable dilution delay and digital control assures consistent temperature and prolongs thermostat life. A dual language digital display communicates machine status and graphic overlays are available for customizing the user interface. The brewer's energy-saver mode reduces tank temperature during idle periods.

Three recipe buttons and two programmable batch switches provide for full and half batch brewing and dual dilution models provide left and right recipe options in one footprint. A brew counter keeps track of how many batches brewed and the SplashGard® funnel deflects hot liquids away from the hand.

The Bunn-O-Matic Corporation (BUNN) is a pioneer in the beverage equipment industry. BUNN was founded in 1957 and built on innovations including the first flat-bottom paper coffee filter for commercial use and the first pourover coffee brewer. Today, BUNN continues to innovate commercial beverage equipment and home coffee brewers from its global headquarters in Springfield, Illinois and provides comprehensive service to customers throughout the world. For more information, please visit www.bunn.com or call 1-800-637-8606 or +1-217-529-6601.
