

BUNN®

announces the new

iMIX SILVER SERIES™

A low-cost alternative for superior hot drinks

iMIX Silver Series™ gives your customers a choice of hot beverages from cappuccino to chai. Available with three or five, 8-pound (3.6 kg) hoppers, the BUNN iMIX Silver Series offers a 7.5 inch (18.4 cm) cup clearance for serving flexibility.

The variable speed motors control product consistency in the mixing chamber, while the high speed, heavy-duty whipper chamber ensures complete product mixing.

Service is easy with front-of-machine access to the tank drain, dump valves, auger and whipper motors.

The iMIX Silver Series Plus models also include an alphanumeric display communicating advertising messages, machine status and technical support contact information. They can be set as push-and-hold or single-size, portion-control units.

Choose BUNN iMIX Silver Series, the most flexible hot powdered dispenser in its category.
