Model ED-12-HB
Water Quality System

Features

Drop-In 23³/₈" (ED-12-HB) Water Quality System

- Perfect for iced or hot tea brewers where hard water can affect tea clarity and taste.
- Increases tea stand time.
- Provides 4,500 grains of softening action.
- Blends softened and regular water for optimum tea flavor and clarity.
- Economical to operate, provides 25 percent more water treatment than standard systems.
- Minimizes service maintenance and equipment downtime with reduced scale forming minerals.
- Easy professional installation.
- Simple-to-install replacement cartridge – ED-HB-2.

For current specification sheets and other information, go to www.bunn.com.

Dimensions & Specifications

Model	Product #	Capacity	Service Flow Rate	Peak Flow Rate
ED-12-HB	34141.0000	4,500 gpg	.75 gpm	3.0 gpm
20" Cartridges				
ED-HB-2	34134.0000	4,500 gpg		

Do I need a water softening system?

BUNN recommends that a water softening system be used when 10 grains per gallon (gpg) or more of hardening minerals are present in your water supply. If you are located in the shaded areas of the map below, then it is likely that you could use a water softening system.

Hardness of Water
(Hardness as CaCo₃ in parts per million)

- Over 240 ppm
- 120-240 ppm (7-14 grains per gallon)

When do I need to replace my cartridge?

Cartridge Replacement Chart	Incoming Water Hardness			
	10 gpg (171 ppm)	15 gpg (256 ppm)	20 gpg (342 ppm)	25 gpg (427 ppm)
Number of 3 Gallon Brews	187	125	93	75
