### **Precise temperature water boilers for hot tea and food prep**

Three separate sizes of hot water boilers are available from BUNN to ensure consistent, high quality water and increase the speed, safety and efficiency of kitchen staff. Dispensing 7.57 to 90.85 litres of water per hour, the units can be used to provide hot or boiling water for beverage or food preparation or for cleaning.

The HW2 model dispenses up to 7.57 litres of boiling water per hour at a constant temperature of 93.3°C. If you require up to 68.14 litres per hour, consider the H5X or H5E. These models are available to dispense precise temperature water at temperatures from 22.2°C-100°C and can be side or wall mounted for space savings. For high volume needs, the H10X dispenses up to 90.85 litres of 100°C water per hour.

All models have a full two-year parts and labour warranty and a three-year parts and labour warranty for the electronics.

For information about BUNN products, parts and service, please contact BUNN Ltd., 7 Beaufort Court, Roebuck Way, Knowlhill, Milton Keynes, MK5 8HL, United Kingdom or phone (44) 1908 241222, fax: (44) 1908 241224 or email [international@bunn.com](mailto:international@bunn.com).
