Measuring for Great Coffee

How much ground coffee should you use for a great tasting cup of coffee?

If you listen to the big supermarket coffee companies, you hardly need to use any grounds. Well, that's a slight exaggeration, but nevertheless, they became big mostly by promising to deliver a decent cup of coffee to thrifty consumers and that meant using less coffee.

Meanwhile, the upscale and boutique so-called specialty roasters want you to use a lot of grounds. It doesn't take a rocket scientist to be a wee bit suspicious of anyone who sells coffee by volume to tell me I need to use more.

Who do you believe?
